

# LEOPARD RETAIL

Retail is highly competitive; customers are demanding higher levels of service, staff are needed on the floor creating sales and managing stock and shrink is always top priority. Regardless of the size of your retail operations, the ability to reliably scan and track inventory using mobile technology helps reduce gaps in the supply chain and create a more profitable, service-orientated environment.

Leopard Retail is a sophisticated, configurable off-the-shelf product which provides all essential functions to make your business perform at its peak. The system comprises of four key components which integrate or stand alone. The result is greater efficiency for stores and head office, provides retailers more time on the frontline creating sales and building customer loyalty - resulting in higher profits.

BENEFITS TO YOUR RETAIL OPERATIONS

**LEOPARD RETAIL** is a user-friendly, solution designed to speed up the capture and processing of inventory control data. It is a 'turnkey' product with in-built modular architecture to allow specific configuration.

- Turnkey – faster and more cost effective than competitors
- User-friendly – lower training costs, increased productivity
- Configurable – rapidly deploy to suit YOUR business

**LEOPARD MANAGER** is a comprehensive multi-functional mobility solution used to handle initial software deployment, software distribution, asset management, preventative maintenance, security, document distribution and backup management.

- Fastest, most cost-effective deployment mechanism
- Allows real-time software updates in the field
- Secure – full device lock-down and encryption of sensitive data

**LEOPARD MESSENGER** is designed from 'the ground up' to be an efficient 2-way data communication tool between front line staff and head office. Suits all networks and provides time and cost benefits to your retail business.

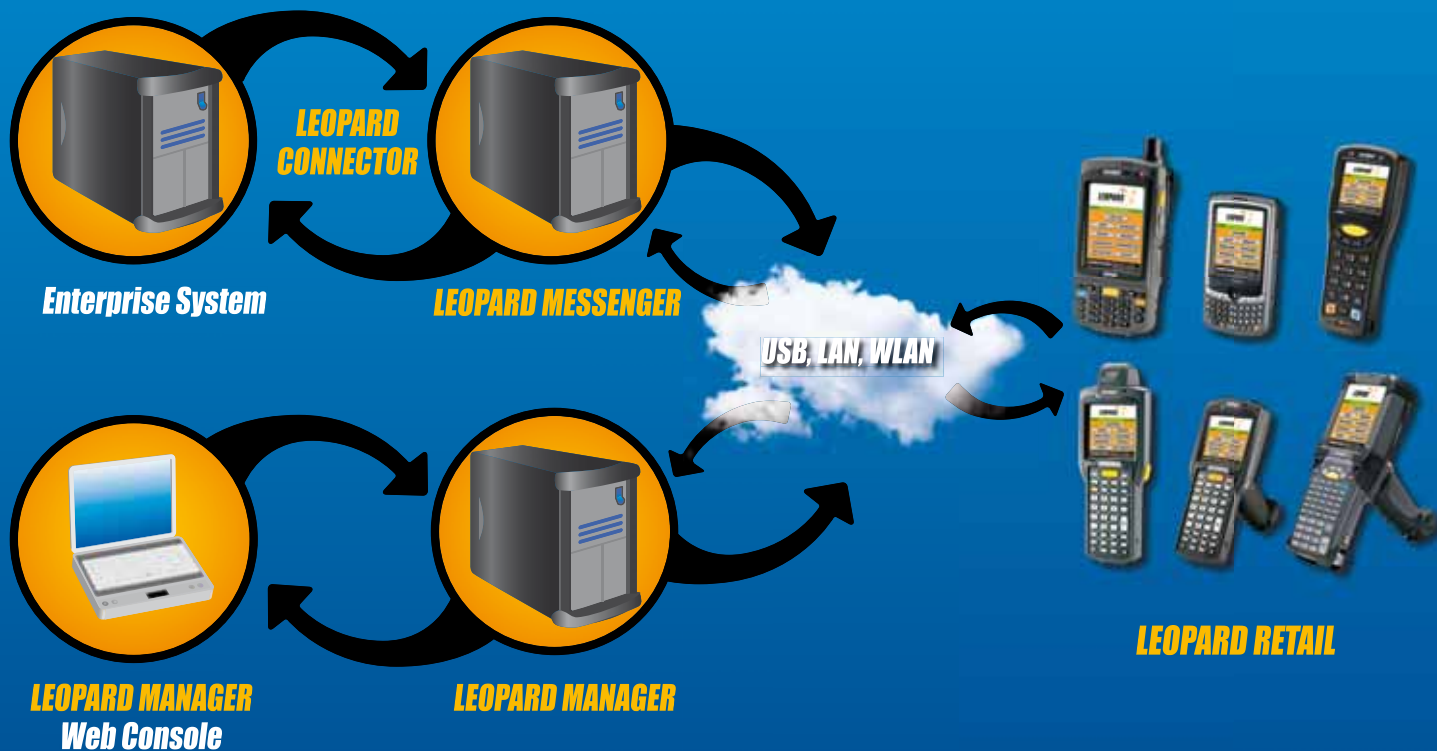

- Stable, proven real-time communications
- Suits all networks GPRS, WLAN, LAN or USB
- Scalable – suits 1 to 1000's users

**LEOPARD CONNECTOR** makes interfacing your mobility solution to your existing enterprise system EASY!

- Integrates with all back-end systems
- Customisable to specific needs
- Cost-effective – eliminates 3rd party involvement

THE MOBILITY SOLUTION

## THE MOBILITY SOLUTION

Combining over 15 years experience spent mobilising the workforce, the innovative Leopard Retail system is a cost-effective, end-2-end, fully-integrated mobile solution designed to grow with your business and improve overall performance.

From initial deployment the benefits are evident: store managers are freed from behind desks, inventory is accounted for and shrinkage is reduced. Staff and customers get on-demand product information, more personalised service and queues move quickly and efficiently. The result – greater productivity and increased profits.

### SPECIFICATIONS
