

Q : How do I determine if my MC35 WLAN Module needs repairing?

WARNING

USING THIS SOLUTION COULD RESULT IN LOSS OF ALL DATA
PLEASE PROCEED WITH CAUTION

Setup Requirements:

- A MC35 Mobile Computer running Windows Mobile 5 or Windows Mobile 6.

[\[How to find Model Number\]](#) [\[Determine OS Version\]](#)

Download Instructions:

No additional files are required to perform this operation.

Installation Instructions:

- Try finding WLANs. To do this, tap Start > Settings, followed by the Connections tab. Then, tap the Wireless Networks icon.
- Check to ensure the hardware is detected by the Mobile Device. To do this, tap Start > Settings, followed by the connections tab. Then select Network Cards. You should see an item starting with 'Marvell Yukon'.
- Check the Mobile Companion icon (next to the Bluetooth icon on the Today screen) to make sure it does not have a cross over it. If it does, refer to the 'How do I restore my MC35 to factory default?' document within the FAQ section of our website. If this does not solve the problem, your device will require a service.
