

Q : How do I determine if my MC9090 WLAN Module needs repairing?

WARNING

USING THIS SOLUTION COULD RESULT IN LOSS OF ALL DATA
PLEASE PROCEED WITH CAUTION

Setup Requirements:

- A MC9090 Mobile Computer running Windows Mobile 5 or Windows Mobile 6.

[\[How to find Model Number\]](#) [\[Determine OS Version\]](#)

Download Instructions:

No additional files are required to perform this operation.

Installation Instructions:

- Try finding WLANs. To do this, tap the Mobile Companion icon (next to the Bluetooth icon on the Today screen). This ensures that the WLAN Module is at least working, even if not correctly.
- Check to ensure the hardware is detected by the Mobile Device. To do this, tap Start > Settings, followed by the connections tab. Then select Network Cards. You should see an item starting with 'Marvell Yukon'.
- Check the Mobile Companion icon (next to the Bluetooth icon on the Today screen) to make sure it does not have a cross over it. If it does, refer to the 'How do I restore my MC9090 to factory default?' document within the FAQ section of our web site. If this does not solve the problem, your device will require a service.
