LEOPARD Systems

Telematics

VEHICLE FLEET VISIBILITY

Leopard Telematics powered by the leading global telematics provider GEOTAB, is a vehicle tracking solution that syncs with on-board computer systems to extract, store and deliver valuable real-time information about your vehicles.

By extracting vehicle metrics via an OBDII port plug-in 'GO' device, Leopard Telematics provides second-by-second tracking of vehicle use, performance and GPS location.

Vehicle fault diagnostics, fuel usage, instrument readings and sub-system data for each vehicle provides a rich breadth of information for valuable insights to improve fleet productivity and operations.

Additionally Leopard Telematics can be leveraged to deliver automatic in-vehicle driver instructions and coaching for your personnel.

When compliance to meet safety and legal regulations is essential, Leopard Telematics tracks and monitors critical checkpoints such as speeding, seatbelt use, driving time for fatigue management, and more.

Plus, collision detection sensors trigger accident notification, and forensic acquisition of vehicle data, to help understand the potential loss and manage the subsequent investigation.

Better knowledge and visibility of exactly how your vehicle fleet is being used will inform your operations management and business improvement decisions.

Enterprise Productivity Unleashed.

Gain a clear picture of your vehicle assets with Leopard Telematics. Extract, monitor and record comprehensive up-to-the-minute vehicle use and driver behaviour data from your entire enterprise fleet.

KEY FEATURES & BUSINESS BENEFITS

1	Understand how each vehicle in your fleet is being operated and know where each vehicle is at all times.
2	Securely extract a wealth of information about your vehicles for accurate reporting, fleet management and specific workflow improvements.
3	Anticipate vehicle maintenance requirements and safety compliance measures.
4	Improve the driving performance of your staff with in-vehicle driver coaching instructions and driving data records.
5	Unlock fleet management profits as driver behaviour and asset efficiencies are optimised.
6	Synchronise Leopard Telematics data with business systems such as your customer relationship, vehicle maintenance and/or compliance regulation managers.
7	GEOTAB device is quick and easy to install without the need for any special tools making it a time and cost-effective alternative to older style hard-wired solutions.

Vehicle Tracking

CAPABILITIES & BENEFITS

WITH TELEMATICS YOU CAN...

- Precisely and rapidly geo-locate individual vehicle assets within your fleet in real time
- Monitor engine diagnostics to address maintenance requirements and act early to repair unexpected issues
- Save time by automating driver time-sheeting and using the optional in-cabin speaker announcements
- Collect data from many optional vehicle systems, such as temperature monitoring, camera systems, automatic driver authentication, load detection systems and more

WITH TELEMATICS YOU PROVIDE...

- Support to your drivers to improve their driving performance with in-vehicle instructions, coaching and safety awareness
- 'Hours of service' tracking for accounting, regulation compliance and staff management purposes
- Liability reduction as possible problems with vehicles are detected early and rectified quickly
- Reliable asset management of capital investments to ensure correct and effective use by your personnel

WITH TELEMATICS YOU GET...

- Useful information on vehicle operation parameters such as speed, excessive braking, swerving, g-forces, collision impacts and much more
- A greater understanding of individual driver behaviour, assessed in relation to their delivery task completions, to improve your overall customer service
- A monthly subscription for an enterprise-grade solution that's easily implemented to replace overpriced ineffective legacy systems

ABOUT LEOPARD SYSTEMS

Established in 1990, Leopard Systems is Australia's leading enterprise mobility solution provider with a reputation for creating innovative strategic solutions.

Our team's deep and up-to-date industry knowledge, platform development flexibility, in-house hardware and other device expertise, client support services and long-term partnership commitment are instrumental to the ongoing success of your mobility solution.

Well regarded within the Transport and Logistics, Field Service, Retail and Supply Chain sectors, Leopard Systems leads the way with its completely configurable platform solution. Available as pre-configured, commercially-viable enterprise-grade solutions designed to increase efficiencies, reduce input error, lift productivity and, of course, increase the bottom line.

By partnering with Leopard Systems your company will benefit from entrusting one company from order to operation and, in doing so, enjoy a seamless implementation, personalised support and outstanding service from industry-trained personnel.
